Top Air Bleed Valve

SBE P/N	Part Description	Primary SBE Application	QTY
23337	Pump Air Release Plug	Air Bleed for Y-Fitting	1
30387	Tube, ½" Y-Fitting	Top connection for plumbing	1
30388	Vinyl tubing, 3/4" x 1/2"	Main Plumbing tube	≈ 3"

- 1. The air release (23337) installs into the single end of the Y-fitting (30387) so that the flat side of the air bleed faces out, and the concave side faces the "Y".
- 2. Slide about a 3-4" length of heavy tubing (30388) over the air bleed side. This will be the top of the plumbing arrangement.

Replacement sensor plumbing

SBE P/N	Part Description	Primary SBE Application	QTY
30388	Vinyl tubing, ¾" x ½"	Main Plumbing tube	4 ft
30389	Cable tie, 4"	Secure plumbing to fittings	12
30458	Cable Tie, 15"	Secure plumbing assemblies to cage or CTD	3

- 1. Use the 30388 heavy tubing to form a flowing path through each sensor ducting system.
- 2. Use the small cable ties (30389) to make a good connection at tubing/sensor interface points.
- 3. Large cable ties (30458) are used to secure the plumbing arrangements to the CTD.
- 4. Refer to the included diagram for an idea of how to plumb a standard CTD.
